

COLOR COMBINATIONS

Lacquers are not carried in stock. The Factory Parts Warehouse will secure and ship as quickly as possible any standard colors not available locally, but cannot guarantee the colors to be an exact match of that on the car, as all colors may change slightly due to climatic conditions and exposure to the weather. For convenience and assistance in procurement, the original color name and numbers are shown with matching stock numbers. On parts using high temperature drying enamels, a reference is made to nearest match of air-drying lacquer.

The color reference charts are divided into two sections; the first chart in each series covers the exterior parts, this is followed by interior color information. The following Page Reference Chart arranged by series can be used as an index for locating color combinations.

Page Reference Chart For Exterior and Interior Color Combinations.

Arranged by Series

SERIES - Page No.

1961	G-16 thru G-20
1962	G-21 thru G-25
1963	G-26 thru G-30
1964	G-31 thru G-35
1965	G-36 thru G-39

EXTERIOR COLORS: Body, Sheet Metal and Wheels Series 1961 thru 1965

The exterior colors are shown in the first chart in each series and are arranged according to the color combination code number. The code number (Paint No.) is stamped on the metal name plate attached to the surface of the left hand side of the shroud panel.

INTERIOR COLORS: Series 1961 thru 1965

Color information for interior parts follows each exterior color chart in each series. When the color application is controlled by various factors, such as exterior color, color of trim, changes during the model year etc., detailed charts are presented for reference. No reference is made to bright finish (Chrome) parts.

For easy reference and to cover the more common areas and parts, the references in the charts are grouped when the color application is similar, for example; Steering column covers, shifter carrier, horn ring hub and steering column bracket - This group of parts in most applications are of the same color.

(X) Color Code Combination will be found stamped on Body Plate on Cowl.

- Ditzler supplier for Forbes refinishing materials.

Application of Code Numbers: Examples

Example 1: Paint Code 1012 (Two Tone).

The first two digits (10) indicate the lower exterior color (Black).

The last two digits (12) indicate the upper exterior color (Aspen White).

Example 2: Paint Code 10 (Single Tone). Indicates entire exterior is painted (Black).
